PRP MASTER - May 6 PM draft.docx

Hello U.S. Annex Co-Leads:

In the interests of time, I am disregarding protocol and niceties and simply asking you to review and revise, **as quickly as you can, and by no later than c.o.b. Thursday 5/11**, your respective chapters of the attached draft Progress Report of the Parties. We secretariat team members are flogging ourselves to get a draft out to the GLEC members well in advance of the GLEC meeting, and we are actually very close, **thanks to your impressive efforts with respect to the initial chapter drafts.**

A little guidance:

- While you are free to review and comment on as much of the draft PRP as you like, we're really looking for your review of your individual chapters.

- When you look at your chapter, please note that it has been reviewed by the Secretariat, and you may see comments, questions, and/or requests for simplification, technical clarifications, or elimination of jargon. It is these items that we would really like you to focus on.

- Don't worry about formatting. It's the text that we're asking for your help on.

- If a comment makes no sense to you, please call, write, telegraph, send smoke signals, use semaphore flags ... just contact me or Jamie Schardt.

Finally, I am blown away by how much work we've accomplished and the really good story told by the PRP. And that's because of the effort and incredible leadership of so many people who have other day jobs, i.e., **you!**

I'll be on deck come Monday morning and ready to provide whatever assistance I can.

Thanks.

Chris

Sorry - I forgot to attach the "GLWQA history timeline" document to previous email.

Hi Secretariat team:

Please find attached a "cleaner" version of the PRP.

In this version, we've accepted CK's edits and new edits are shown in track-changes. Please review and revise as needed.

Most importantly, this version includes comment boxes that clearly show where follow-up action is required (i.e. to seek clarification or confirmation from Annex co-leads), and some outstanding questions for secretariat discussion.

As a next step, can I suggest that Ash, and someone from US EPA, follow up with annex leads on an urgent basis on Monday? We should also try to schedule another secretariat call for next week (Tuesday?) to resolve any outstanding issues.

Thanks,

Carla

Thanks so much for this Chris - appreciated. I also took some time yesterday to edit (but on a paper version) but held off incorporating to the word document pending your edits.

I scanned through your edits and am fine with them. I'm going to suggest that Ash review this new version in the morning (accepts your edits as appropriate, etc.) and then I'll add any additional suggested edits to the next "cleaner" version. This method may be faster than group calls in the short term.

Carla

My eyes are tired and my mark-up of the PRP is attached! Sorry for the delay.

Chris
